mWRAPR Cryovials

Biobanking tubes & Storage Media (RUO)

PRODUCT DESCRIPTION

mWRAPR Cryovials & mWRAPR multi collect media provides the ideal solution for long-term sample preservation for large scale biorepositories. The tube and media guarantees the safe storage of your high-value genomic material and samples for future downstream processing without compromising the quality of genetic material

FEATURES

- Indefinite storage at -20°C down to vapor phase of liquid nitrogen temperatures
- Free of DNase & RNase
- · Easy sample processing
 - DNA / RNA can be directly isolated from mWRAPR media using common commercial extraction kits

- Stabilize genetic material for up to 14 days at room temperature
- Ultra-pure, medical grade polypropylene tubes
- Accurate and reproducible DNA/RNA yields for downstream processing & analysis
