

mWRAPR Multi-sample

Multi-Sample Collection Kit

(RUO)

PRODUCT DESCRIPTION

Conveniently collect, store and transport any type of biological specimens including cells, tissues, skin, tooth, soil samples, plants, micro-organisms and bodily fluids at room temperature with mWRAPR multi-sample collection kit for efficient analysis.

mWRAPR multi sample collection DNA/RNA Tube effectively inactivates pathogens and arrests their growth while preserving pathogenic genetic material for a variety of tests.

FEATURES

- Zero infection risk during sample handling & transport.
- Accurate & reproducible DNA/RNA yields for down-stream processing and analysis.
- Zero contamination shelf-life for up to 2 years.
- No liquid nitrogen cold storage required
 - Protection from freeze-thaw cycles
- Easy sample processing
 - DNA / RNA can be directly isolated from Multi-Sample collection tubes using common commercial extraction kits.

SPECIFICATIONS

Tube material	Polypropylene
Tube size	10 mL
Swab	Sterile
Stabilization solution	3 mL
